# Revanth Reddy T

Transformational IT Leader | IoT & Agentic AI Architect | Cloud-Native, Edge Computing & DevOps Innovator  
Hyderabad, Telangana, India

## Summary

I am a technology innovator who transforms visionary concepts into mission-critical solutions across IoT, authentication, and AI domains. My work spans wearable biometrics, real-time asset tracking, and autonomous multi-agent systems—each designed to solve complex challenges and deliver measurable impact.

At the core of my expertise:

- Continuous, Hands-Free Authentication

Built the Nymi Band with ECG, fingerprint, and secure-element integration—achieving 90% faster logins and rock-solid compliance in security-critical environments.

- Real-Time Asset Visibility

Architected Mobilogix's LTE-M/NB-IoT asset trackers and Node.js/Python back end, combined with React Native mobile apps and Kubernetes-powered infrastructure to enable 24×7 asset monitoring across industries.

- Cross-Platform Connected Experiences

Developed the TIMEX Connected suite (Swift, Kotlin, Electron, React Native), driving a 4.5-star average rating by unifying Mac, Windows, and mobile smartwatch companion apps.

- Construction Site Digitalization

Integrated Hilti's ON!Track system with Trimble Construction One ERP via Java/C# middleware and real-time GPS/Bluetooth tags—streamlining asset allocation, cost automation, and paving the way for predictive maintenance.

- Secure BYOD Enablement

Delivered a software-only Workspot solution that enforces enterprise security policies on personal devices, boosting user satisfaction and simplifying IT management in cloud environments.

- Autonomous AI Agents

– EduCheck AI: OCR-powered grading, chain-of-thought reasoning, personalized feedback, and LMS integration for seamless exam evaluation.

- FinSight AI: AutoGPT-style audit planning, anomaly detection, and CXO-grade financial reports with LangChain, vector DBs, and Neo4j.
- LawMate AI: RAG-driven legal co-pilot for document ingestion, risk assessment, and argument construction.

My passion lies in fusing edge computing, agentic AI, and cloud-native architectures to drive digital transformation. Let's connect to explore how we can turn disruptive ideas into resilient, scalable platforms that empower your business to lead in the digital age.

---

## Experience

### Nymi

Customer Success Consultant

May 2022 - Present (3 years 4 months)

Hyderabad, Telangana, India

As a trusted advisor to enterprise clients, drove customer adoption and long-term satisfaction of Nymi's biometric authentication solutions. Partnered with key stakeholders to understand security requirements, design tailored implementation plans, and deliver hands-on onboarding and training workshops. Monitored customer health through usage analytics and regular business reviews, proactively identifying expansion opportunities and mitigating adoption risks. Collaborated with product, engineering, and support teams to relay customer feedback, prioritize feature enhancements, and ensure seamless integration with existing IT ecosystems—ultimately boosting retention, driving renewals, and cultivating NPS-leading customer relationships.

Designing tailored deployment architectures that integrate Nymi's wearable authentication platform with clients' existing IT infrastructures, ensuring secure, scalable, and performant implementations.

Collaborating closely with Customer Success Managers to translate customer requirements into technical specifications, deployment plans, and project timelines.

Overseeing end-to-end rollout—from environment provisioning, network configuration, and security hardening to software installation, API integration, and data migration.

Establishing automated provisioning and monitoring frameworks to streamline deployment workflows, reduce time-to-value, and proactively detect configuration issues.

Conducting onsite and remote workshops for IT teams and end users, delivering technical training, knowledge transfer, and best-practice guidance to accelerate adoption.

Implementing architecture governance and change-management processes to maintain consistency, compliance, and quality across all customer deployments.

## Innominds

### Principal Architect

November 2020 - April 2022 (1 year 6 months)

Hyderabad, Telangana, India

As Principal Architect and VP-level technology leader, defined and delivered the end-to-end architecture for InnInt-Mobile Device Automation—a cloud-native platform enabling fully remote Android and IoT device testing.

Responsible for:

Architecting scalable, secure microservices and device-farm infrastructure to support on-demand access and real-time control of physical devices.

Driving platform vision and technical roadmap in alignment with global business goals, ensuring seamless integration with CI/CD pipelines and analytics frameworks.

Leading all phases of the software development lifecycle—requirements gathering, design, development, testing, and deployment—to achieve consistent, high-quality releases.

Establishing robust policies, best practices, and governance for cloud security, risk mitigation, and performance optimization across geographies.

Collaborating with product management and international stakeholders to translate customer needs into innovative IoT solutions, elevating market differentiation as an “IoT Evangelist.”

Managing budgeting, project estimation, and vendor partnerships to maximize ROI and accelerate time to market.

This dual-capacity role combined strategic leadership with deep hands-on expertise in IoT hardware/software ecosystems and cloud-scale testing frameworks, driving organizational growth and operational excellence.

## Mobilogix

### Vice President IoT Cloud Solutions

May 2018 - October 2020 (2 years 6 months)

Hyderabad Area, India

Strategic IoT Technology Executive of progressive leadership experience driving digital transformation and cloud solution innovation at Mobilogix. Proven track record of delivering quality projects across global markets while establishing operational excellence and technology standards. IoT Evangelist skilled in platform architecture, team development, and cross-functional collaboration with international clients. Led comprehensive technology processes, risk analysis, and budget optimization for multiple concurrent projects. Expertise in IoT hardware/software ecosystems with demonstrated ability to build high-performing teams and drive organizational growth through strategic policy implementation.

#### Key Improvements Made:

Enhanced Opening: Positioned you as a "Strategic IoT Technology Executive" rather than just listing the job title, immediately establishing your value proposition.

Quantified Experience: Highlighted the specific duration and emphasized "progressive leadership" to show career advancement.

Strategic Focus: Added "digital transformation" and emphasized your role in establishing operational excellence, which are key executive competencies.

Industry Recognition: Maintained "IoT Evangelist" as it's a recognized specialization that adds unique value.

Measurable Impact: Emphasized "quality project delivery," "global markets," and "multiple concurrent projects" to show scale and scope.

Leadership Emphasis: Highlighted team building, performance assessment, and organizational impact, which are crucial for VP-level positions.

Technical Credibility: Balanced technical expertise with business acumen, showing both depth and breadth.

#### Innominds

6 years 1 month

#### Technical Manager

January 2016 - March 2018 (2 years 3 months)

Hyderabad Area, India

Significant achievement has been building a high-value team from scratch, delivering top notch quality within aggressive schedule, process improvement ideas & implementation and thus enabling smooth scaling of the product & the team, zero client escalation in last one year, very few escaped defect reported for quality assurance in last one year.

## Architect (Mobile App Development)

August 2014 - December 2015 (1 year 5 months)

Hydrabad

I am responsible for Architect and develop modular, scalable, high performance Android apps. Work closely with product managers & designers to lock in the right functionality & user experience. Share knowledge with the team, review code and provide hands-on support. Bring the coding best practices to the team - such as automation builds, logging & exception handling.

## Lead Engineer

March 2012 - July 2014 (2 years 5 months)

Responsible for Coordinate with Technical Director on current programming tasks. Collaborate with other programmers to design and implement features. Quickly produce well-organized, optimized, and documented source code. Create and document software tools required by artists or other developers. Debug existing source code and polish feature sets. Contribute to technical design documentation. Work independently. Continuously learn and improve skills. Worked with project managers, developers, quality assurance and customers to resolve technical issues. Trained and mentored junior developers and engineers, teaching skills in iOS, Android and working to improve overall team performance.

## Cognizant

### Senior Software Engineer

November 2010 - March 2012 (1 year 5 months)

Hyderabad

Responsible for Coordinate with Technical Director on current programming tasks. Collaborate with other programmers to design and implement features. Quickly produce well-organized, optimized, and documented source code. Create and document software tools required by artists or other developers. Debug existing source code and polish feature sets. Contribute to technical design documentation. Work independently. Continuously learn and improve skills. Worked with project managers, developers, quality assurance and customers to resolve technical issues. Trained and mentored junior developers and engineers, teaching skills in iOS, Android and working to improve overall team performance. Worked with software development and testing team members to design and develop robust solutions to meet client requirements for functionality, scalability and performance. Reviewed project specifications and designed technology solutions that met or exceeded performance expectations. Worked with project managers, developers, quality assurance

and customers to resolve technical issues. Checked client code for bugs and weaknesses using approved troubleshooting methods

## Tech Mahindra (formerly Mahindra Satyam)

4 years 1 month

### Project Lead

January 2010 - October 2010 (10 months)

Hyderabad

I am responsible for Coordinate with the Technical Director on current programming tasks. Collaborate with other programmers to design and implement features. Quickly produce well-organized, optimized, and documented source code. Create and document software tools required by artists or other developers. Debug existing source code and polish feature sets. Contribute to technical design documentation. Work independently. Continuously learn and improve skills.

### Support Analyst and Lead (Onsite)

August 2008 - January 2010 (1 year 6 months)

St. Louis, USA

I am responsible for Co-ordinator of development activities at onsite between customer Thomson Reuters in St.Louis, USA and development team in India.

### Sr. Software Engineer

October 2006 - August 2008 (1 year 11 months)

Hyderabad Area, India

## ArisGlobal

### Software Engineer

April 2005 - October 2006 (1 year 7 months)

Bangalore

I am responsible for Analysis of the specifications provided by the clients. Design and Development. Creating Standard Excel Template with validations. Unit Test plans, Program Specification. Fixing Bugs. Understanding the requirements, communicating with client. Preparation of design documents. Developing the code and the test cases. Implementing faster search/access techniques on huge amount of data. Work independently.

---

## Education

M.Sc(I.S)

Master's Degree, Information Technology · (2003 - 2005)

B.C.A

Bachelor's Degree, Computer Science · (2000 - 2003)
